Jack P. Kutner
Chief Operating Officer
BigBelly Solar
50 Brook Road
Needham, MA 02494

Dear Jack,

On behalf of the Red Sox organization, I wish to recognize you along with BigBelly Solar for the tremendous role that your efficient, self-sufficient, and eco-friendly trash compactors have played in our initiative to help make Fenway Park "Green". The immediate effect is evident in the positive publicity that we have received since adding them around our ballpark and surrounding neighborhood. BigBelly Solar is a true pioneer in taking the growing sustainability movement to waste management.

It is truly remarkable to witness the enormous difference that such a simple change as replacing our trash receptacles with your Solar Compactors is making in our community. Not only are they successful in keeping pace with the tremendous volume of trash that accompanies our historic streak of sellout crowds, they drastically reduce the eyesore of the abundant amounts of overflowing trash receptacles surrounding the ballpark, the exceeding cost of manpower needed to constantly empty them, and the carbon footprint left behind by that system. Passersby can't help but notice the ingenuity behind the solar panels that self-power the compactor allowing the bins to hold five times the trash of normal receptacles, and it sends the message that we are committed to supporting sustainable living.

When you think of the Red Sox, we not only want you to think of a story book baseball club, but also of a city and its people. We want the Red Sox brand to be that of a passion, a pride in a city, a community, and an environment. Thanks again for assisting us in providing a clean atmosphere necessary for our visitors to fully enjoy the Fenway Park experience, as well as enhancing our community and environmentally friendly image that we are striving to build.

Best Regards,

Joe Januszewski
Vice President, Corporate Partnerships
